FOR IMMEDIATE RELEASE

JOBS Program positively impacts business community

“My name is Jasmine Jefferson, and this year I completed the Jobs Program. The Jobs Program is a great opportunity for hands on workplace training. From the classroom training to actually getting a job for the summer and trying the job has helped me a lot. Through the program I have improved my typing, listening, communication, and even team work skills. I’m now capable of filing out applications, I-9, and W-4 with no problems. I’ve gotten a good taste of how real work force will be like in life, with getting up in the morning to go to work to getting my paycheck on Fridays. You can really get the real deal on how to become a better employee. With the Jobs Program hands on training anything is capable of happening. And with this training at McDonough Real Estate Company, I know that I will be well prepared when it comes my time to actually go out and get a job for myself.”

-Jasmine

Employer Quote:

“I cannot believe how quickly Jasmine has accomplished every project from real estate research, to mass mailings, answering the phone, filing, routine typing, excel spreadsheets, and even assisting with my volunteer work on Hopewell-Prince George Crime Solvers reports. She is only 14. Absolutely amazing. This young Prince George County student will be a huge asset to any employer in the future... I count myself as so lucky to have her as my JOBS intern this summer.” In addition to working this summer, she is running track and most recently placed 3rd in the 400 meter race in a JR. Olympics Track Meet at North Carolina A&T University, Greensboro, NC.
